ABOUT ME

I am a professional backend developer having 2.5 years of experience in creating robust, scalable and maintainable backend systems for different kind of websites and mobile apps.

WORK EXPERIENCE

Rocky Mountain Technologies - Backend developer

2024-NOW

- Developed image processing cron-job using ffmpeg library with auto roll-back feature.
- Communicated with clients and front-end developers to deliver 100% customized backend system.
- Optimized the company's whole backend system (including servers) which resulted in decreasing the LOOPos backend api response time from 4sec to 1/4th of a second.
- Reduced the server cost of LOOPos product by 15%.
- Optimized LOOPos backend docker image size and build time from 2GB and 4 minutes to 650MB and 2 minutes.

Creative Line - Full stack developer

2023-2024

- Monitored and setup the whole server for my full-stack application from scratch.
- Integrated my backend with existing mssql database.
- Utilized Nginx and IIS web-servers to host my full-stack app built in ReactJs and NodeJs.
- Installed SSL certificates from scratch on Nginx web-server to protect my app and hence build trust among company clients.

Digimantra Labs - Associate web developer

2022-2023

- Utilized microservices architecture to reduce the server load by 5%
- Developed test cases of APIs that reduced the error rates of an API by 2%.
- Integrated PayTM payment gateway to deliver 100% secure payment solutions.

12th Standard

2018 Pass-out

63.4%

U.S.P.C JAIN PUBLIC SCHOOL

10th Standard

2016 Pass-out

8.6 CGPA

SKILL

- JavaScript • TypeScript • Node.js • Nest.js • MongoDB • PostgreSQL • GitHub • Git
- Docker • Redis • HTML • CSS • Tailwindcss

PROJECTS

LOOPos

It is a food ordering app developed by Rocky Mountain Technology India Pvt Ltd. The app provides a POS system to restaurant owners and mobile apps and websites to customers, allowing them to order food. Restaurants receive these orders through the POS system. The app also supports dining facilities at participating restaurants. **I am working on this project as a backend developer.**

Fastrack Driving Academy

It is a company client's project that provides a platform to truck driving training academy owners in Canada to manage their academy's operations, such as trainee admissions, generating government forms for trainees, managing instructor attendance, and more. **I have worked on this project as a backend developer.**

Earthlink

EarthLink LLC, founded in 1994, is a live project based on agile methodology that provides internet services including broadband internet, web hosting, and EaaS (email as a service) in 90% of the US households. **I have worked as a backend developer on their product for over a year.**
