PROJECTS

DIGITAL CENSUS OF INDIA

The Census Management and Monitoring System is a digital platform designed to streamline census operations, including data collection, verification, and analysis. It enhances accuracy, transparency, and efficiency by enabling real-time monitoring of field activities, ensuring reliable demographic insights for informed decision-making and effective government planning. **I am working on this project as a front-end developer.**

TECH STACK – Enterprise full-stack frameworks, component-based UI library, distributed systems architecture, secure API gateways, and high throughput database management system.

LOOPos

It is a food ordering app developed by Rocky Mountain Technology India Pvt Ltd. The app provides a POS system to restaurant owners and mobile apps and websites to customers, allowing them to order food. Restaurants receive these orders through the POS system. The app also supports dining facilities at participating restaurants. **I am working on this project as a backend developer.**

TECH STACK – Nest.js, Express.js, Typescript, Git, GitHub, MongoDB, Redis, Bullmq, Microservice architecture, WebSocket, Socket.io, Docker, Caprover

FASTRACK DRIVING ACADEMY

It is a company client's project that provides a platform to truck driving training academy owners in Canada to manage their academy's operations, such as trainee admissions, generating government forms for trainees, managing instructor attendance, and more. **I have worked on this project as a backend developer.**

TECH STACK – Nest.js, Express.js, Typescript, Git, GitHub, MongoDB, Docker, Caprover

JUST HOME

It is a real estate based website which lists all the properties which are available for sale in some parts of Canada. **I have worked on this project as a backend developer.**

TECH STACK – Nest.js, Express.js, Typescript, Git, GitHub, MongoDB, Docker, Caprover

EARTHLINK

EarthLink LLC, founded in 1994, is a **live project** based on **agile methodology** that provides internet services including broadband internet, web hosting, and **EaaS** (email as a service) in 90% of the US households. **I have worked as a backend developer on their product for over a year.**

TECH STACK - Node.js, Fastify.js, PostgreSQL, GraphQL, Microservice, Restful APIs, API Gateway, CI/CD Pipelines, Testing frameworks like Jest, ESLint, Git, Bitbucket etc.

EXPERIENCE

Project Engineer, C-DAC (May 2025 - Present)

- Driving the end-to-end front-end life cycle of the national census application, ensuring seamless integration between UI components and complex backend services.
- Leading front-end development for the **Digital Census of India**, architecting a high-performance, scalable web application to digitize national data collection for over 1.4 billion citizens.
- Acted as a technical bridge between senior developers and executive RGI officials to identify and unblock technical bottlenecks, accelerating project milestones.
- Engaged in strategic requirement gathering with the **Registrar General of India (RGI)** to architect scalable solutions for the **Digital Census of India**.
- Utilizing the micro-service architecture to cater the need of project.

Backend developer, Rocky Mountain Technologies India Pvt Ltd (Apr 2024 – Apr 2025)

- Developed image processing cron-job using ffmpeg library with **auto roll-back** feature.
- Communicated with clients and front-end developers to deliver **100% customized backend system**.
- Optimized the company's whole backend system (**including servers**) which resulted in decreasing the LOOPos backend API response time from **4sec** to **1/4th** of a second.
- Reduced the **server cost** of LOOPos product by **15%**.
- Optimized LOOPos backend docker image size and build time from **2GB and 4 minutes to 650MB and 2 minutes**.

Full-time freelance software developer, Creative Line India Pvt Ltd (Nov 2023 – Mar 2024)

- Monitored and setup the whole **server** for my **full-stack application** from scratch
- Integrated my backend with existing **mssql database**.
- Utilized **Nginx** and **IIS** web-servers to host full-stack app.
- Installed **SSL certificates** from scratch on Nginx web-server to protect app and hence build trust among company clients.

Associate web developer, DigiMantra Labs (Aug 2022 – Nov 2023)

- Utilized **micro services** architecture to reduce the server load by 5%.
- Developed **test cases** of APIs that reduced the error rates of an API by 2%.
- Integrated PayTM **payment gateway** to deliver 100% secure payment solutions.

EDUCATION

B.Tech in ECE
